**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-61 are drawn to a content delivery system that modifies and transfers data over a network, classified in class 709, subclass 246.
  - II. Claims 62-69 are drawn to a method of implementing control instructions in order to bring users together over a communications network, classified in class 709, subclass 204.
  - III. Claims 70-91 are drawn to a domain name system and the particulars of DNS servers operating together, classified in class 709, subclass 220.
2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I has separate utility such as changing the format of data transferred between computers. Invention II has separate utility such as matching multiple computer users and connecting them to each other over a network. Invention III has separate utility such as configuration processing between computers. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Eric Hyman on June 21, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2155

Applicant is advised that in order for the reply to this requirement to be complete, it must include an election of the invention to be examined even if the requirement be traversed (37 CFR 1.143).

5. In accordance with 35 U.S.C. 133, a shortened statutory period of one month (not less than 30 days) is hereby set forth to reply to this Office Action. See also MPEP 710.02(b).
